

Device Blueprint

Sketch a map of all your smart devices:

- 1** Draw floorplan of your house.
- 2** Add in all your IoT devices.
- 3** Color areas of your home you think IoT devices are collecting data from using watercolors.
- 4** Outline in thick marker areas of your home you are most active in.

Reflection:

Did you discover anything surprising?

If you could eliminate one device, which one would it be?
