

Storytime with Data

You will need: pen, paper

Duration: 10 min

Create a story using 5 data points:

- 1** Pick 5 data points from the visualization provided on the right.
- 2** Reflect on what each data point suggests.
- 3** Write a short story using the data points to create a narrative (alternatively, you can use your own data!)

Reflection:

What was the most challenging part of the writing process?

Was your approach to writing about data specific and methodical or more loose and inspirational?
